

Work healthier. Live more consciously.

Health check for managers

Medical service

The Health Check is a medical assessment that makes it possible to recognize early signs of health disorders. Your personal results allow us to give you tips and recommendations to protect or improve your health. There is the possibility to consult with medical doctors from various fields of specialization.

With your schedule in mind, we have optimized the procedure so that you only have to spend half a day for the examination and the debriefing. You will receive all the results in print and in a digital version at the end of the consultation around noon.

Examination procedure and scope

Please arrive at our practice in the morning with an empty stomach for the blood withdrawal. Please refrain from eating solids after midnight. As you will require a full bladder for the ultrasound examination, we ask you to drink plenty of fluids. Suitable drinks include water and unsweetened or artificially sweetened tea. Milk, fruit juices and coffee are not allowed.

After the blood sample, electrocardiogram recording and lung function test, you will go for an ultrasound of the abdominal organs and the carotid artery. Afterwards you will be served a full breakfast and a newspaper. For one hour, you will be thoroughly questioned and examined by one of our medical experts. This is followed by an exercise ECG on the bicycle ergometer. In the process, it will be recorded whether your heart and blood pressure function normally under physical strain. After a shower, one of our doctors will be available for the concluding review and will discuss the results with you, also giving you suggestions and tips. The Health Check takes 4½ hours.

Medical services

- Medical history (personal, familial)
- Whole-body examination
- Vaccination status
- Stress levels (burnout/risk)
- Health behavior (sport and exercise, diet and stimulants, sleep)
- Concluding discussion (with suggestions for lifestyle changes or brochures for further information)
